To whom it may concern:

This letter is to express my opposition to the proposed project by LightSquared that would eventually render the GPS network we have in place useless. There are numerous companies and individuals in the agriculture and construction industries alone that depend on this valuable service every day. Interference with the current GPS system would take away years of progress and valuable data currently held by surveyors, road construction workers, and farmers, just to name a few. Millions of people rely on GPS technology to navigate their automobiles, guide airplanes, route emergency vehicles, and spatially manage land. **Please do not allow the GPS technology that so many people have adopted to be taken away from us until a feasible alternative can at least be put in place.**

Thank you,

Ben Jahnke
